### Abstrak

*The purpose of this research is to find out the investment licensing arrangements in the enactment of Law No. 11 of 2020 on Work Copyright and the impact on sustainable environmental survival. This research method is a type of normative legal research with a legal approach, historical attachment, conceptual approach, as well as comparative approach. The results of research with the enactment of Law No. 11 of 2020 on Copyright Work, more or less the regulation arrangement will affect investment in a country. Investment regulations that do not overlap and do not conflict with each other are the expectations of investors. Therefore, structuring the regulations that have the spirit to encourage and support the growth of investment and sustainability assessment criteria in Law No. 11 of 2020 on Work Copyright and its derivatives are still following environmental prevention instruments that include the process of planning, utilization, control, maintenance, supervision and law enforcement, it's just that the involvement of the community in amdal documents is indeed reduced as in the provisions of the copyright law that changes Article 26 of Law No. 32 of 2009 related to the preparation of amdal documents carried out by involving communities directly affected by business plans and/or activities.*
