3. Bukti Review

Response to reviewer:

Reviewer suggestion	Response
Title: Make the title more adequate to the contents. Avoid using geographical terms.	I made adjustments to the title
Abstract: Use GATR-GJBSSR format, also in relation to the abstract	adjust the contents of the abstract according to the writing instructions
Type Paper: Author should add the appropriate JEL code. Please find the link: https://papers.ssrn.com/sol3/displayjel.cfm	Add Code : Z39
Intro: The significance of the topic and context is not well explained it should be upfront,	I add context and phenomena at the beginning of the paragraph and explain the organization of the court at the end of the paragraph
Litrev: The literature review should be background for the hypothesis or scientific questions elaboration.	I made adjustments and added some references
Method: It is very narrow! It must contain population, sample choice method, sample description in relation to the structures etc. Also methods should be described as well as data collection time period and method.	I updated the reference and added an explanation of the process of data collection and analysis
Result: Add more results and statistical tables, also relate with previous studies.	I added an explanatory section to the paragraph, about the analysis and its relevance to previous research
Discuss Discussion should relate to previous studies.	
Conclusion : The conclusion section is too narrow. It should consist of the recommendations, study limitations, and future study directions.	I add suggestions on further research and research opportunities
Reference: References list is narrow and many errors. Author must add more references of high order journals. All references must be in English , in APA style and well cited in the paper.	replace bibliography using mendeley and APA format
It is highly recommended to use Mendeley software.	
Similarity and Editing,	I did the editing and similarity adjustment
