Abstract

This study aims to examine the effect of organizational commitment, microfinance and accountability on poverty alleviation. The study was conducted on 120 respondents from a population of 480 members in a farmer group in the southern coastal area of West Java. The questionnaire test was also conducted on 64 respondents before the research was conducted. The analysis model used Structural Equation Model (SEM).

The results revealed the both simultaneous and partially organizational commitment, microfinance and accountability have positive and significant impacts on poverty alleviation of farmer groups in the south coast of West Java.

Based on the empirical findings of this study, accountability in farmer groups in the southern coastal area of West Java should be improved, to enhance the organization's commitment, microfinance, and accountability in the five critical dimensions and sustainability of the social-empowerment sector.

Keywords: organizational commitment, microfinance, accountability

Background

More and more parties are getting to believe that the financial and microcredit mechanisms are an important strategy in managing poverty that is managed effectively. The great a central and local governments, as well as private institutions are busy distributing microcredit funds to community groups through financial institutions and micro credit (MCK).

Achieving the goal of a large company and small companies to run effectively and efficiently needed organizational commitment, capital and human resources accountability that can manage properly and correctly so that the level of poverty to be reduced. Members have a very important role in the success of an organization within the farmer group. The more the ability possessed by a farmer's group lines of course his work performance will increase so that it can directly assist in enhancing a farmer's group.
