Dear
Editor International Journal of Science Review (INFLUENCE)

We have read and used scientific articles published in INFLUENCE.
The performance of the INFLUENCE was excellent, and the published article helped us conduct research and write scientific reports.

I am Irawan R. D. Budiando, representing other authors from Universitas Bunda Mulia, Indonesia.
We have completed a scientific article entitled "***The Importance of Absorption Capacity and Innovation in Improving Company Performance.***"

We hope this article can be published in the INFLUENCE because exciting findings in the scientific report can become new treasures in science, especially in management sciences.
We are willing to go through the review process following INFLUENCE standards.

Best Regards,

Irawan R. D. Budiando
Universitas Bunda Mulia, Indonesia

Dear

Irawan R. D. Budiando, et al.
Universitas Bunda Mulia, Indonesia.

The INFLUENCE Editorial Board has received the team article.
I appreciate the team's interest in INFLUENCE.

The team article will be processed according to the publication standards at INFLUENCE.
I beg you to be patient while waiting for the notification from the INFLUENCE Editorial Board.

Always check email because the correspondence is only via email.

Best Regards,

--

Dear

Irawan R. D. Budianto, et al.
Universitas Bunda Mulia, Indonesia

Thank you for submitting the manuscript to INFLUENCE.

We have completed our evaluation, and the reviewers recommend reconsidering the manuscript following minor revisions. Please resubmit the revised manuscript by July 20th, 2021 or ask whether an alternate date would be acceptable. We invite you to send it back after addressing the comments below.

When revising the manuscript, consider carefully all issues mentioned in the reviewers' comments: outline every change made in response to their comments and provide suitable explanations for any remarks not addressed. Please also note that the revised submission may need to be reviewed.

To submit a revised manuscript, please log in as an author at this email, and navigate to the "Revision" folder. INFLUENCE values team contribution, and I look forward to receiving the revised manuscript.

Editor and reviewer comments:

Reviewer #1:

1. The choice of utilizing a quantitative method with a descriptive analysis approach is appropriate for investigating the relationship between absorption capacity, innovation, and company performance. However, it would be beneficial to provide more details about the sample selection process, criteria for selecting the ten manufacturing companies, and any potential limitations in the sample representation. This additional information would enhance the rigor and transparency of the study.
2. The use of Return on Assets (ROA) as the indicator for company performance is well-established and widely accepted. To strengthen the interpretation of results, consider briefly discussing the rationale behind choosing ROA and how it aligns with the research objectives. Furthermore, discussing potential alternative performance indicators and their implications could provide a more comprehensive view of the company's overall performance.
3. The application of the outer model for assessing convergent validity, discriminant validity, and composite reliability is a robust approach for validating the measurement model. To enhance the statistical analysis, consider including information about the reliability coefficients obtained for each construct, as well as any steps taken to address potential issues related to multicollinearity or common method bias. Providing these details would bolster the confidence in the measurement model's validity.
4. The conclusion that Absorption Capacity positively and significantly influences Company Performance is supported by a strong original sample estimate and a notable T-statistic value. To strengthen this finding, consider discussing the practical implications of this result for manufacturing companies, such as how they can leverage their absorption capacity to enhance their financial performance and competitiveness. Additionally, while Company Innovation did not show a significant effect on Company Performance, it would be insightful to explore potential reasons behind this finding and suggest avenues for future research to investigate this relationship further.
5. The conclusion drawn from the study's findings aligns with the research objectives and provides valuable insights into the role of absorption capacity in driving company performance. To enrich the discussion, consider elaborating on the broader implications of these findings for practitioners, policymakers, and researchers. How can companies enhance their absorption capacity? What strategies can they adopt to foster innovation and ultimately improve their performance? Expanding on these points would contribute to the practical significance of the study's outcomes.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear
Editor International Journal of Science Review (INFLUENCE)

Thank you for the Editorial Board response to INFLUENCE.
We have read the revised instructions from the reviewers.
We will immediately correct the article according to the reviewers.

Best Regards,

Irawan R. D. Budianto
Universitas Bunda Mulia, Indonesia

Dear
Editor International Journal of Science Review (INFLUENCE)

Thank you for the patience of the INFLUENCE Editorial Board. We were waiting for the revision of our article.

We have made improvements according to the reviewer's instructions. We will be happy if there are still points that need to be improved again in the article.
The revised Article is Attached.

Best Regards,

Irawan R. D. Budianto
Universitas Bunda Mulia, Indonesia

Dear

Irawan R. D. Budianto, et al.
Universitas Bunda Mulia, Indonesia

Thank you for the team's efforts to make improvements to the article.
Based on the reviewers' considerations, the article has, at some point, increased.
However, the team has to improve on a few more points. Hopefully team are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. The study's focus on absorption capacity and innovation in the context of company performance is indeed valuable. To enhance the potential impact of the research, consider discussing how the findings could extend to different industries or sectors beyond manufacturing. Exploring potential variations in the relationship across diverse contexts could provide deeper insights into the generalizability and robustness of the conclusions.
2. While the article adequately references the key constructs of absorption capacity, innovation, and company performance, consider expanding the discussion by incorporating more recent and relevant literature. Integrating studies that highlight recent trends in absorption capacity enhancement or innovative strategies could enrich the theoretical framework and strengthen the relevance of the research within the current academic discourse.
3. Given the non-significant effect of Company Innovation on Company Performance, it might be beneficial to delve into the specific dimensions or aspects of innovation that were examined in the study. Discussing the potential limitations of the chosen innovation measure and exploring alternative approaches to capturing innovation could provide a more nuanced understanding of why certain innovation-related variables might not directly impact performance.
4. To bridge the gap between research and practice, consider dedicating a section to managerial implications. Translate the research findings into actionable recommendations that manufacturing companies can apply to enhance their absorption capacity and foster a culture of innovation. Practical strategies, such as targeted training programs or collaborative initiatives, could be suggested to help practitioners leverage the insights gained from the study.
5. While the current analysis provides valuable insights, exploring potential interactions or moderation effects between absorption capacity, innovation, and other relevant variables could offer a more comprehensive understanding of the dynamics at play. Employing advanced statistical techniques, such as moderation or mediation analyses, might unveil nuanced relationships that contribute to a deeper interpretation of the study's outcomes.

Articles that have been revised and please send them back via this email.

Kepada: Irawan R. D. Budianto <irawanrenataduta@gmail.com>

Dear Author

Irawan R. D. Budianto, Hadita & Yulianah

Warm Greetings!

ACCEPTANCE LETTER

It's a great pleasure to inform you that, after the peer review process, the **"*The Importance of Absorption Capacity and Innovation in Improving Company Performance*"** team article has been accepted for publication in the INFLUENCE Regular Issue 2021. Please make a payment publication fee.

Thank you for submitting the paper to this journal. We hope to receive it in the future too.

Email: irawanrenataduta@gmail.com

On behalf of Editorial Team of the “**INFLUENCE: International Journal of Science Review**”, we are pleased to inform you that your Paper “**The Importance of Absorption Capacity and Innovation in Improving Company Performance**” has been **ACCEPTED** for publication in the **INFLUENCE: International Journal of Science Review** in Current Issue of 2021 as per the recommendations given by the peer review group of experts.

----- Overall Evaluation -----

1. Scope of Manuscript: 85%
2. Originality of Manuscript: 88%
3. References are Cited Properly: Yes
4. Formatted Properly: Yes
5. Result: Satisfactory

Final Decision: **ACCEPTED**

For any further query feel free to contact us.

Sincerely,

Editor in Chief
