Reviewer A:

Dear authors!

Thank you for the opportunity to read this research work.

I wish the authors good luck with the other reviews and all the best for their future research.

Recommendation: Resubmit for Review

Reviewer C:

A good paperwork, with an impact in the field. I am convinced that it will be used in future research. However, it should be indicated more precisely what was the method of sampling the 110 respondents and why it was limited to this number 110. For such a study the sample should have been more extensive, but this is undoubtedly a sample. quite representative.

Recommendation: Accept Submission
