

[JAETS] Editor Decision

2022-10-11 03:26 PM

Yuri Delano Regent Monitoring:

We have reached a decision regarding your submission to Journal of Applied Engineering and Technological Science (JAETS), "A MODEL OF INVENTORY PLANNING USING MONTE CARLO SIMULATION IN RETAIL SUPERMARKET WITH CONSIDER TO COMPETITORS AND STIMULUS STRATEGIES ".

Our decision is: Revisions Required

Reviewer A:

1) please rewrite your abstract, now you use a very narrative style to describe the procedures of doing your research instead of providing a whole picture of your work. You should use a few sentences to describe:

the purpose of your study, why you did this research?

the method you used in this study, what method did you use to solve your research problem?

The results of your study, what have you got from this study?

the implication of your study, what are the practical and theoretical implications of your study? I mean how can the results be applied to theory and practices.

the values of your study, what's your contribution to theory or/practice?

Through this way, readers (including me) could have a whole picture of your work.

2) In the introduction section, you should summarize the gaps of existing literature, then present you aim to do.

3) It is not sufficient in the discussion on the results, there are so many equations and numbers, however, people might have less interest in them, we are more interested in the meanings of these numbers.

4) What is the limitation of your study? as well as the contribution.

Recommendation: Revisions Required
