Dear Author

I have received the review on your paper and would like to ask you to do an extensive improvement and upload a new revised version.

Sincerely
Farhang

Reviewer #1

This paper uses simple regression analysis to examine the hypotheses of the survey. The study does not use all necessary statistical tests such as ANOVA, Durbin-Watson, etc. I recommend the authors to extend the statistical results and provide sufficient support for the hypotheses.

Also, the literature review is very much domestic and the authors could possibly replace/add more related articles.

Dear Dhian

Could you please email me the results of the similarity index using a software.

Sincerely
Farhang
