Major Comments

:  
The title has Novelty, a maximum of 12 words and avoid writing the place and research location in the title

Add an explanation of what information can be obtained from the displayed image

The conclusion is in the form of a brief description of the findings / research questions and not rewriting the data on the results and discussion with a solution sentence. Maximum 150 words

Avoid using numbers in the abstract, just describe the meaning of the numbers

Add 2 or 3 background sentences before the goal. Overall the maximum word

count is 150

Check and include reference details used. Mendeley citation source details should be corrected according to IEEE style  
For example, when writing titles, you should use Capital Each Word and so on

Add background on the importance of this research before writing the research objectives

In this section only write down the results and there is no discussion, please write down the discussion by juxtaposing and juxtaposing the findings of this study with previous research

## Major Comments

:  
Title

The title should be made more attractive and have novelty and avoid writing research locations

The title of the article should be written briefly and clearly. The title of the article should first state the main idea of the new article, followed by other explanations. The title of the article must indicate exactly the problem to be raised

## Research result

Data on the results should be presented with graphs or tables to make it more interesting. avoid anything conceptual.

## Discussion

The discussion discusses the findings or novelty of research findings in articles and juxtaposes/compare the findings with the results of previous research in relevant journal articles. Minimum 15 relevant research sources from both national and international journal articles

in the discussion avoid using Numbering and Bulleting. Please make it into a paragraph by adding a connecting sentence

## Abstract

Maximum of 150 words, The purpose of the abstract is only written down with one main goal, The main method is raised, the concluding sentence is written clearly and according to the title of the article.

## Methodology

In the methodology, avoid writing conceptually, write down why the method was chosen, you must write down the reasons, who are the participants, their characteristics, the data to be collected, the instruments used. The methodology avoids the conceptual/understanding. Describe the instruments used in more detail. For example the instrument is validated or tested etc. Add illustrations in the form of pictures or charts

Illustrate the research design with pictures/charts

Write down the number of the table or picture and avoid the words below, following, above and similar words
