I would like to congratulate the authors for their good work. This paper is well-written. Below are the non-critical improvements that should be made by the authors:

1. Please add recommendations based on your results, in particular for Bekasi City government. I believe your

research results will have a great impact on policy and city planning.

2. Please format your paper according to IEEE guideline.

3. Ensure that your paper length is not more than 6 pages in IEEE format.

----- Overall evaluation -----

The paper presents an interesting and valuable work for supporting a city planning. It is well written in term of its organization, structure, and English. However it is still not yet following IEEE format. So please reformat it according to the IEEE template provided for ICCED.

The paper can be enriched with suggestions that amplify the implication of the results.
