<u>COMMENTS:</u>						

STRENGTHS:

- The manuscript is in good strength of application.
- The article provides a thorough examination of the Dark Triad personality traits, covering various aspects including definitions, identification methods, management strategies, and impacts in the workplace. This comprehensive coverage ensures readers gain a holistic understanding of the topic.

WEAKNESSES:

- The Author should come up with different conclusion. The conclusion is with to many references.
- The article primarily focuses on the Dark Triad traits in a general context without considering potential cultural variations in the manifestation and impact of these traits. Discussing cultural influences could enrich the analysis and provide a more nuanced understanding of the topic.
- While the article briefly mentions gender and age differences in relation to the Dark Triad traits, it lacks a detailed exploration of these factors. Providing more in-depth analysis and research findings on gender and age differences would enhance the completeness of the discussion.
