Title	A FRAMEWORK FOR ASSESSING INVESTOR BEHAVIOR AND TECHNOLOGY ADOPTION IN CRYPTOCURRENCY INVESTMENTS	
Abstract	Purpose	The objective of this research is to determine the extent to which investors' behavior, particularly in accordance with consumer knowledge, perceived benefits, convenience of use, and innovation, can impact the decision to invest in cryptocurrency.
	Design/methodology/approach	The research method used is the explanatory method, with the sample being cryptocurrency investors who are still active and live in Jakarta. Using the Machin and Campbell formula, 114 respondents were obtained. Quota sampling is used as a sampling technique. For analysis, this research uses the Technology Acceptance Model Approach.
	Findings	Investors' preferences and perceptions of ease of use, rewards, and understanding of cryptocurrencies significantly impact investors' decisions to adopt cryptocurrencies. Another finding is that respondents agreed that perceived benefits do not affect ease of use. This causes respondents' thinking about investment to stagnate because they believe every investment they make must be easy to use and provide benefits.

limitations/implications

thorough data, researchers anticipate that future research will broaden the study's scope and incorporate other variables..

Originality/value

Capable of serving as a benchmark for assessing cryptocurrency use and serving as an alternative investment vehicle for Indonesians. It can give information to those who wish to invest in cryptocurrencies so they at least know what the risks are and how much the coin can increase or fall, preventing the recent wave of widespread fraud in society.

Key Words

Framework ,Investor Behavior, Technology , Cryptocurrency

## A FRAMEWORK FOR ASSESSING INVESTOR BEHAVIOR AND TECHNOLOGY ADOPTION IN CRYPTOCURRENCY INVESTMENTS

Evaluation by Category	Evaluation Level (A:Excellent, B: Good, C: Fair, D: Poor)
1. Originality of the paper	Good
2. Importance of the results	Good
3. Clarity of lay out	Fair
4. Correctness of the contents	Fair
5. Interest of the field of research	Good

Review Results	Review after major revision
