ABSTRACT

This research aims to analyze the extent of public perception in 10 major Indonesian cities regarding the effectiveness of the Covid-19 vaccine so far, in terms of Trust and Solidarity as sub-dimensional aspects of social capital. The sociodemographic characteristics obtained from the survey results are age, education and occupation. The reasearch coverage of 10 major cities in Indonesia includes: Menado, Bali, Padang, Palembang, Makasar, Medan, Jabodetabek, Bandung, Yogya and Surabaya, where Jabodetabek covers the areas of Jakarta, Bogor, Depok, Tangerang and Bekasi. The research approach was carried out on a quantitative basis, using purposive sampling technique, where 500 respondents were taken from online survey. The research results show that Trust and Solidarity have a positive impact on public perceptions regarding the effectiveness of the Covid-19 vaccine.
