

## Reviewers Report

### Manuscript Details

**Manuscript Number :** 3J16F

**Title :** Analysis of Preemptive Shortest Job First (SJF) Algorithm in CPU Scheduling

**Author(s)** Tri Dharma Putra

### Comments of Manuscript

1. The subject matter organized well by the author in whole manuscript
2. Abstract paragraph efficiently written as per the projected work
3. Introduction section bestows a general background and detailed work of proposal
4. Conceptual and theoretical basis of the work having good quality
5. The related work representations which offers a useful overview to the current research
6. Analytical framework and hypotheses of work is good
7. Methods and materials, findings are well defined by the author
8. The presented results are reliable as per their stated research model
9. Conclusion section restated well by the author
10. References are adequate and mentioned in appropriate areas
11. Quality of author's proposed work is having essential logical contexts
12. The usefulness of this work is worthy to publish
13. Manuscript summarized and well organized and acceptable

**Overall Recommendation:** **Accepted** for publication

**Revision:** 0 :: Nil

[0-Nil, 1-Minor, 2-Major]

**Required modification:** Nil
